Technical Summary:

- 4+ years of professional experience as a **Software Developer** designing, developing, testing, and deploying enterprise applications.
- Experience working on **Financial, Insurance, and Healthcare** domain applications.
- Proficient in **Java, Spring Boot, Microservices, RESTful APIs and Hibernate** for backend application development
- Experienced in unit testing using **JUnit** and **Mockito**, and working with Oracle and MySQL databases.
- Experience with **cloud technologies, version control systems**, and **Agile (Scrum/Kanban)** development using **Jira** and **Confluence**

Skill Matrix

Programming Languages	Java 8, Java 11
Java Technologies	Java, J2EE, Servlets, Spring, Spring Boot, Spring MVC, Hibernate, JDBC, RESTful APIs, Apache Kafka
Web Technologies	HTML, CSS, Bootstrap, JavaScript, Angular, Node.js, React.js
Cloud Technologies	Amazon Web Services (AWS), Microsoft Azure, Google Cloud Platform (GCP)
Databases	Oracle, MySQL
Web/Application Servers	Apache Tomcat
Build Tools	Maven, Jenkins
IDE / Tools	Eclipse, IntelliJ IDEA, Spring Tool Suite (STS)
Testing Tools/ Others	JUnit, Mockito
Operating Systems	Windows
DevOps/ Containers	Docker

Work Experience:

Company : NTT DATA Canada, Halifax, NS

Dec 2022 - Jun 2024

Client : Fidelity Investments

Role : Software Developer

Responsibilities:

- Developed and enhanced features for the **Defined Benefits** application at Fidelity Investments.
- Worked extensively on business calculations related to **Participant Plans, Earnings, Employment Events, Accounts, Interests, Eligibility, Employee Service**, and **Classifications** based on age and years of service.
- Analyzed business requirements and participated in technical design, development, and testing of various modules.
- Developed new features and resolved application defects using **Java 8** based on business requirements.
- Implemented client-specific business rules and enhancements based on Defined Benefits plan requirements.
- Developed and optimized **SQL** queries to support application functionality and data validation.
- Used **Maven** for dependency management and application builds.
- Worked with the **Spring Framework, Abacus**, and **Optimus** frameworks for application development.
- Used **Git** for source code version control and collaboration.
- Worked with **Jenkins** pipelines for continuous integration and deployment.
- Used **Bitbucket** and **GitHub** for source code repository management and version control.
- Collaborated with **QA, Business Analysts**, and **Solution Architects** throughout the software development lifecycle.
- Performed peer code reviews to ensure code quality and adherence to coding standards.
- Provided knowledge transfer and technical guidance to new team members.
- Worked in an **Agile Scrum** environment with two-week sprint cycles.
- Used **Confluence** for project documentation and knowledge sharing.
- Participated in migrating application components from Java 8 to **Java 11**.
- Developed unit test cases using **JUnit** and **Mockito** to ensure code quality and application reliability.
- Used **Jira** to manage user stories, track defects, and update task progress.

Environment : Java 8, Java 11, Spring, REST APIs, Git, GitHub, Maven, Jenkins, Bitbucket, Abacus, Optimus, JUnit,

Mockito, MySQL, Jira, Confluence.

Company : The Co-operators, Guelph, ON

Dec 2020 - Oct 2022

Role : Software Developer

Responsibilities :

- Developed and enhanced features for the **Auto Insurance Claims Processing** application.
- Analyzed business requirements and participated in the design, development, testing, and deployment of application modules.
- Developed new features and resolved application defects using **Java 11** based on business requirements.
- Used **Maven** for dependency management and application builds.
- Used **Spring JDBC** to perform database operations and integrate application components with the database.
- Developed batch processing jobs using **Spring Batch** for efficient data processing.
- Used Core Java concepts including **Exception Handling** and **Multithreading** to implement application features and enhancements.
- Developed and maintained business rules using the **Drools Engine**.
- Developed **REST APIs** to process data from the database and integrate with external REST services.
- Worked in an **Agile Scrum** environment with two-week sprint cycles.
- Used **Confluence** for project documentation and knowledge sharing.

Environment : Java 11, Spring JDBC, Spring Batch, REST APIs, Maven, Drools, JUnit, Mockito, MySQL, Jira, Confluence.

Company : Atos Syntel, Pune, India

May 2019 - Dec 2019

Role : Associate Java Developer

Responsibilities :

- Developed and enhanced features for a **Healthcare** application used to manage patient medication details.
- Developed backend **microservices** using the **Spring Boot** framework.
- Implemented asynchronous messaging using **Apache Kafka** between producers and consumers.
- Used **Docker** to containerize and run application services.
- Used **Maven** for dependency management and application builds.
- Used **Swagger** for API testing and **Mockito** for unit testing.
- Developed and maintained **SSRS** reports to monitor daily application volume and performance.
- Monitored **REST API** functionality to ensure reliable integration with dependent applications.
- Developed **SQL** queries, stored procedures, and packages for data retrieval, insertion, and validation.
- Used **Jira** to manage user stories, track defects, and update task progress.
- Collaborated with **Database Administrators, QA Engineers, Business Analysts, and Client Representatives** to deliver business requirements.

Environment: Java 8, Spring Boot, Microservices, REST APIs, Apache Kafka, Docker, Swagger, Maven, MySQL, SSRS, IntelliJ IDEA, Jira.

Education

St. Clair College, Windsor, ON

Jan 2020 - Apr 2021

Post-Graduate Diploma in Data Analytics | CGPA: 3.6/4.0

Sri Indu College of Engineering, Hyderabad, India

Aug 2015 - May 2019

Bachelor of Technology in Computer Science and Engineering | CGPA: 3.4/4.0

Projects

NLP-Based Healthcare Data Analysis (Academic Project – St. Clair College)

- Developed an **NLP-based healthcare data analysis** solution for **Windsor Hospital** as part of the Machine Learning course.
- Analyzed healthcare data using **Python** and presented insights through visualizations.
